

PETITION 1 - SAY NO TO PESTICIDES IN WASHTENAW COUNTY

We, the undersigned residents of Washtenaw County are opposed to the use of any pesticides/insecticides or genetically modified Bt agents for any City-wide, Township-wide or County-wide pest problems (including mosquitoes, gypsy moths, etc.) found in Washtenaw County. We urge our elected officials and public servants to seek safer NON-CHEMICAL alternative approaches to any City-wide, Township-wide or County-wide pest problems that may occur. Pesticides are known to be harmful to people, pets, birds, aquatic life, other animals, and the environment. Where substances are known to have the potential for health and environmental damage, they should not be used. WE SAY NO TO PESTICIDES!!!
